- Rationale-** We are listing a better-quality lever arch file because stronger mechanism This should be more resistant to breakage.
- The 5 subject organisers have proved unsuccessful in allowing students to properly organise and store their work in the vast majority of cases.
- Students should purchase a second lever arch file for use at home in which to archive old work. This should allow school bag weight to be minimized.
- Students studying Maths, Geography, Physics and /or Chemistry courses will need a non-programmable Scientific Calculator. This is listed in the "General" section above
